Running the ASP.NET Example

Overview

This is a simple ASP .NET example that illustrates how to integrate the .NET Engine into your ASP web application.

Requirements

- Windward Reports .NET Engine
  - Available from the Windward downloads page.
- Visual Studio 2005 or later

Tutorial

1. Open Catapult. (Found under Start -> All Programs -> Windward Studios -> Windward Reports .NET Engine -> .NET Engine Help Launcher)
2. In the Catapult menu, click the ASP.NET tab.
3. Source Directory button.
4. Run the file copy_dlls.bat, selecting the option Directory when prompted.
5. Close the source folder.
6. Click the ASP.NET Project File button.
7. On the toolbar at the top of the Visual Studio window, click Build, Rebuild Solution.
8. On the toolbar at the top of the Visual Studio window, click the Debug icon.
9. A browser will open with options for your report. Follow the instructions in the browser to run your report.
