Running the C# Example

Overview

These files can be used to create a command-line .exe which is equivalent to the runreport.exe located in the /test folder of the .NET Engine installation. The RunReport application will accomodate a variety of datasource types while the RunReportXML is limited to .xml datasources.

This project will open in Visual Studio 2005 or Visual Studio 2010 and then convert the project file.

Requirements

- Windward Reports .NET Engine
  - Available from Windward downloads
- Visual Studio 2005

Tutorial

1. Open Catapult. (Found under Start -> All Programs -> Windward Studios -> Windward Reports .NET Engine -> .NET Engine Help Launcher)
2. In the Catapult menu, click the C# tab.
3. Click the C# Project File button.
4. On the toolbar at the top of the Visual Studio window, click the Debug icon.
5. The code will run in a command line, and then automatically close.
6. In Catapult, click the Source Directory Button.
7. Navigate to RunReport -> bin -> Debug.
